

Solution Architecture

Recording test case

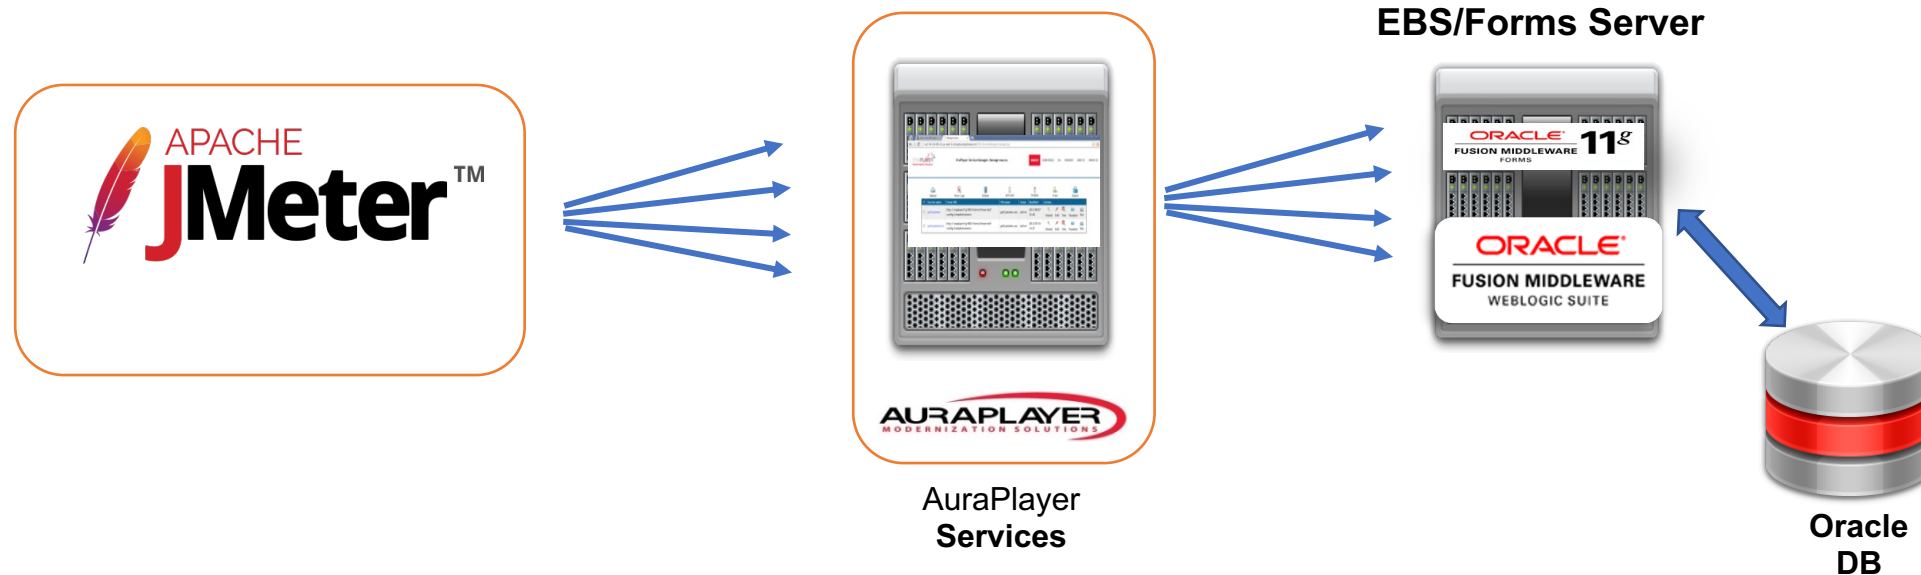

Solution Architecture

Option A: Load testing using Jmeter and AuraPlayer as a plugin

Solution Architecture

Option B: Load testing using Jmeter via AuraPlayer

- ServiceManager can be installed on tomcat/weblogic, or on portable server on the user's desktop
- Test case should be created/recorded on ServiceManager
- Option A:
 - The test case should be exported to 2 files.
 - AuraPlayer playback jars files should be installed on Jmeter (copy jar files to Jmeter lib)
 - Playback would be done from Jmeter directly
- Option B:
 - Run HTTP requests from Jmeter against AuraPlayer ServiceManager
 - Playback would be done from AuraPlayer ServiceManager
